PROFILE

Business Intelligence professional with hands-on experience in transforming complex datasets into meaningful insights using tools like Domo, Power BI, and advanced SQL. Proficient in building interactive dashboards, automating data workflows, and supporting real-time decision-making through ETL and data modeling. Strong understanding of business KPIs, with a focus on delivering solutions that enhance performance and drive data-informed strategies.

PROFESSIONAL SUMMARY

- Strong experience as a Business Intelligence (BI) Developer specializing in Power BI Desktop and Power BI Service for end-to-end report development and deployment.
- Expertise in building interactive and visually compelling dashboards, reports, and KPIs to drive strategic business decisions.
- Proficient in using SQL for data extraction, transformation, and loading (ETL) operations from diverse sources like relational databases, flat files, and cloud services.
- Skilled in writing complex DAX expressions including calculated columns, measures, and tables to implement advanced business logic in reports.
- Experienced in creating efficient data models by defining relationships, managing hierarchies, and optimizing models for high performance.
- Strong understanding of Power Query (M language) for advanced data transformation and data preparation tasks within Power BI.
- Hands-on experience with Power BI Service for publishing reports, creating workspaces, scheduling data refreshes, and setting up row-level security (RLS) for secure data access.
- Adept at translating business needs into technical specifications and delivering robust business intelligence solutions.
- Expertise in implementing data governance, report versioning, and access control policies in the Power BI environment.
- Knowledge of integrating Power BI reports into platforms like SharePoint, Teams, and embedding into web applications.
- Skilled in performance tuning techniques including data reduction strategies, query optimizations, and managing large datasets in Power BI.
- Ability to create dynamic and user-friendly reports using features like bookmarks, tooltips, drill-through, and custom visuals.
- Experienced in working with Agile/Scrum methodologies for BI project delivery and collaboration.
- Strong analytical and problem-solving skills to interpret business requirements and turn them into actionable insights.
- Excellent communication skills to interact with stakeholders, understand requirements, present solutions, and provide user training.
- Continually updated with the latest features and best practices in Power BI, SQL Server, and DAX advancements.

PROFESSIONAL EXPERIENCE

Procorp Systems, *Bussiness Intelligence* 09/2023 – present | Hyderabad, India

Roles & Responsibilities:

- Developed and maintained interactive dashboards and reports using BI tools such as Domo and Power BI.
- Translated business requirements into technical specifications to support reporting and data analytics.
- Performed data extraction, transformation, and loading (ETL) to prepare data for analysis and visualization.
- Wrote complex SQL queries to gather insights from structured databases and ensure data accuracy.
- Collaborated with stakeholders to define KPIs, monitor business performance, and identify growth opportunities.
- Automated recurring reports to improve operational efficiency and reduce manual work.
- Conducted data validation and troubleshooting to ensure integrity and reliability of BI solutions.
- Integrated multiple data sources to build unified datasets for reporting and business insights.
- Provided ad-hoc reporting and analytics support to departments including sales, finance, and operations.
- Participated in data governance and documentation to support data transparency and standardization.

SKILLS

PYTHON, POWER BI, DOMO, SQL, EXCEL, HTML, CSS.

CERTIFICATES

- AWS CLOUD PRACTIONER

EDUCATION

R.G KEDIA COLLEGE OF COMMERECE, *MCA* 08/2021 – 09/2023 | Hyderabad, India
