Kalyan Mandula

kalyanmandulap@gmail.com | +91 7680945231| www.linkedin.com/in/kalyan-mandula

About:

- Results oriented Data Engineer with 4.5 years of hands-on experience in designing, implementing, and optimizing data solutions on the Azure platform.
- Leveraging a strong foundation in data engineering principles, cloud architecture, and advanced analytics, I am committed to delivering scalable, efficient, and reliable data solutions that drive business insights and enhance decision-making processes.

Professional Summary:

- Proficient in leveraging Python and Spark to develop data processing pipelines and analytical solutions.
- Experience in Developing PySpark applications in Databricks for data extraction, transformation, and loading.
- Good understanding of Spark Architecture including Spark Core, Spark SQL, Data Frames, Driver and worker nodes, Executors and Tasks.
- Experienced in spark performance tuning and query optimization techniques for faster data processing.
- Highly skilled in data ingestion and processing using Databricks, Spark, Scala, SQL and various data ingestion frameworks to efficiently manage and transform data from diverse sources including Snowflake, Salesforce, File gateways, API's and RDBMS to target Azure data lake storage.
- Good knowledge on Azure Data Services such as Azure datalake, Azure SQL database, Azure Databricks.
- Demonstrates expertise in building scalable data pipelines and optimizing ETL processed to ensure seamless data flow and integrity.
- Good experience in Agile methodology
- Knowledgeable on scheduling tools such as Appworx
- Knowledgeable on Change Data Capture and Reconciliation frameworks.
- Experience with creation of technical document for functional requirement, Impact analysis, Technical Design documents, and Data Flow diagrams.
- Quick learner with excellent written and oral communications, analytical and problem-solving skills and a good team player, Ability to work independently and well-organized.
- Expertise in various phases of project life cycles (Design, Analysis, Implementation, and testing).

Work Experience:

Tiger Analytics | Hyderabad | Dec 2024 - Present
Role - Senior Software Engineer
Responsibilities:

- Engaging in upskilling initiatives in PySpark, Databricks and Snowflake to enhance Technical expertise.
- Worked on internal POCs and hands-on exercises to deepen knowledge in data engineering and cloud technologies.

- Collaborated with teams to understand best practices in data processing, optimizing and pipeline development.
- Currently working on completing external certifications in Databricks and Azure Data Engineer to enhance expertise in cloud-based data processing and analytics.

Infosys | Hyderabad |Nov 2023 - Dec 2024
Role - Technology Analyst
Responsibilities:

- Designed and implemented data ingestion pipelines using Databricks and Spark to process data from various sources including Salesforce, Snowflake, File Gateways, API's, RDBMS.
- Maintained the pipelines built for data ingestion by monitoring the full and daily incremental loads in databricks.
- In case of any failures, performed RCA for the pipelines deployed and thereby provided resolution by doing code fix.
- Developed Scala and SQL scripts to transform and load data into Azure Data Lake Storage.
- Optimized ETL processed to enhance performance and reduce processing time.
- Implemented monitoring and alerting mechanisms to ensure data pipeline reliability.
- Conducted code reviews and provided technical guidance to junior team members.
- Implemented data quality checks and validations to ensure data integrity.
- Collaborated with data analysts to understand data requirements and deliver actionable insights.
- Participated in design and implementation of data models for efficient data storage and retrieval.
- Collaborated with cross-functional teams to gather requirements, analyze challenges facing by the project teams and thereby provided solutions.
- Supported data ingestion from various data sources including RDBMS, API's and file systems.
- Assisted in the development and maintenance of data pipelines using spark and scala.
- Have been continually upskilling over Big Data Technologies.
- Completed internal level certifications on skill tags such as Data Professional and Big Data Professional.
- Completed certifications on PySpark, Python, SQL, Agile Methodologies.

Technologies:
Spark, Scala, SQL, Azure Databricks, SQL, Jira, Azure Data Lake

Cognizant | Hyderabad | Apr 2022 - Nov 2023
Role - Programmer Analyst
Responsibilities:

- Designed and implemented scalable data solutions on the Azure cloud platform utilizing Azure Data Lake, Azure SQL database, Azure Databricks.
- Developed and optimized PySpark data processing pipelines for extracting, transforming, and loading (ETL) large volumes of data.
- Involved in extracting and transforming large sets of structured and semi-structured data from Azure Data Lake and loading into Azure SQL server.

- Worked on different file formats such as Parquet, JSON, CSV, and Delta.
- Conducted performance tuning and optimization to improve the efficiency and reliability of data processing workflows.
- Utilized SQL and Python for data manipulation, analysis, and visualization.
- Responsible for estimating the cluster size monitoring and troubleshooting of the Databricks job cluster.
- Optimize PySpark jobs on Databricks for faster processing.
- Implemented data transformation activities such as filtering, cleansing, and aggregating data to prepare it for analysis.
- Scheduled and monitored pipeline executions to ensure data consistency and accuracy.

Technologies:
Azure Data Lake, Azure SQL, Azure Databricks, Azure Data Factory, PySpark, Python, SQL, ServiceNow, Jira.

Tata Consultancy Services | Hyderabad | Jul 2020 - Apr 2022
Role - Assistant Systems Engineer
Responsibilities:

- Worked as a Production Support Engineer.
- Monitored and maintained data pipelines to ensure data integrity, availability, and performance.
- Investigated and resolved production issues related to data processing, storage, and retrieval in a timely manner.
- Collaborated with development team to implement enhancements and optimizations to existing data pipelines.
- Conducted root cause analysis for production incidents and implemented preventive measures to minimize future occurrences.
- Overriding and restarting jobs as per the requirement
- Identified and implemented automations that help support team to reduce manual efforts.
- Provided on-call support and participated in the incident management process to ensure timely resolution of critical issues.
- Identified different trends of data and prepared visualizations in the form of charts and graphs using PowerBI.

Technologies:
PySpark, Python, SQL, Azure Databricks, MS SQL, PowerBI, ServiceNow.

Certifications:

- Microsoft Azure Fundamentals AZ-900
- Microsoft Data Fundamentals DP-900
- Databricks Lakehouse Fundamentals
- MTA – Introduction to Programming using Python
- Tiger Graph Associate Certifications

Education:

- B.Tech | Mallareddy College of Engineering and Technology CGPA - 7.3 | 2016 - 2020
- Intermediate | Sri Chaitanya Junior Kalasala CGPA - 8.8 | 2014 - 2016
- SSC | Vani High School CGPA - 9.2 | 2013 - 2014

Professional Attributes:

- Excellent Communication skills
- Analytical Thinking
- Problem Solving abilities
- Adaptive and Collaborative
- Motivated attitude
